Overview

Data.gov is the U.S. Government’s open data site, designed to unleash the power of government open data to help the public, achieve agency missions, drive innovation, and uphold the ideals of an open and transparent government.

- Unified Federal open data program and national cross-government catalog
- Launched in 2009 with 47 datasets and grown to over 200,000, approximately 9000 APIs. 60 Federal agencies (and over 100 sub-agencies) and 50 non-federal (state, city, county)
- Enterprise inventories of metadata of public and non-public datasets
- 2013 Open Data Policy - 2014 Data.gov 2.0 (Harvesting model)
  - Expands scope of Data.gov to about 80 additional agencies, makes GSA’s operation of Data.gov required by statute
232,948 datasets found

National Student Loan Data System  
*Department of Education* — The National Student Loan Data System (NSLDS) is the national database of information about loans and grants awarded to students under Title IV of the Higher...

ZIP Code Data  
*Department of the Treasury* — This study provides detailed tabulations of individual income tax return data at the state and ZIP code level.

Demographic Statistics By Zip Code  
*City of New York* — Demographic statistics broken down by zip code
Data.gov Components

- National Data Catalog - catalog.data.gov
  - CKAN - leading open source data catalog platform
- Blog, Events - data.gov (WordPress)
- Metadata management SaaS - inventory.data.gov
- Policy support and interagency monthly meetings, listserv
- Resources.data.gov (repository required by OPEN Government Data Act)
- Project Open Data Dashboard
- In development: Data Catalog Kit (Multi-tenant CKAN)
Fruit and Vegetable Prices

Metadata Updated: May 2, 2019

How much do fruits and vegetables cost? ERS estimated average prices for 153 commonly consumed fresh and processed fruits and vegetables.

State- and county-level records of disaster designations made by the US Secretary of Agriculture in response to widespread and severe drought.
Users

- General public, business, researchers, government, academia.
- 20 million+ page views (FY 2019)
- ~2000 requests/questions annually from the public
OPEN Government Data Act - PL 115-435

- Open Data Policy provisions become statutory
- Amends 44 USC sections 3502-3511

“§3511. Data inventory and Federal data catalogue

(a) Comprehensive Data Inventory.—

“(1) IN GENERAL.—In consultation with the Director and in accordance with the guidance established under paragraph (2), the head of each agency shall, to the maximum extent practicable, develop and maintain a comprehensive data inventory that accounts for all data assets created by, collected by, under the control or direction of, or maintained by the agency. The head of each agency shall ensure that such inventory provides a clear and comprehensive understanding of the data assets in the possession of the agency.

(b) Public Data Assets.—The head of each agency shall submit public data assets, or links to public data assets available online, as open Government data assets for inclusion in the Federal data catalogue maintained under subsection (c), in accordance with the guidance established under subsection (a)(2).

(c) Federal Data Catalogue.—

“(1) IN GENERAL.—The Administrator of General Services shall maintain a single public interface online as a point of entry dedicated to sharing agency data assets with the public, which shall be known as the ‘Federal data catalogue’. The Administrator and the Director shall ensure that agencies can submit public data assets, or links to public data assets, for publication and public availability on the interface.
OPEN Government Data Act provisions

- Requirements on agencies (within one year)
  - Strategic information resource management plan (that includes an open data plan)
  - Make each data asset available in an open format, and make each public data asset available under open license

- Data inventory and Federal Data Catalog (within 180 days)
  - OMB Director to issue guidance on requirements for metadata
  - Each agency to develop and maintain comprehensive data inventory, with updates every 90 days
  - GSA to maintain a single public interface (data catalog) that agencies can submit data assets or links
  - OMB, GSA and OGIS to develop and maintain an online repository of tools and best practices

- Chief Data Officers
  - Head of each agency to designate
  - Functions include carrying out the open data requirements
  - Chief Data Officer Council within OMB

- Reports
  - GAO will evaluate completeness of data inventories and report in 3 years
  - OMB will issue report on agency performance within 1 year of enactment, biennially thereafter
Data.gov Team Contacts

- datagovhelp@gsa.gov
  - Used for agency assistance, technical questions
- inventory-help@gsa.gov
  - Used to provide support to agency users of inventory.data.gov
- datagov@gsa.gov
  - All purpose, used by general public for questions
